

A stacked bar chart showing the distribution of the number of clusters (1 to 10) for different values of  $\alpha$ . The x-axis represents the number of clusters, and the y-axis represents the frequency. The bars are stacked with various colors: blue, orange, green, red, brown, purple, pink, and grey.

Number of Clusters	Frequency
1	1
2	2
4	1
6	1
8	1
10	1

The chart displays the distribution of 1000 samples across 10 categories for different numbers of clusters (1, 2, 4, 6, 8, 10). The x-axis is labeled with the number of clusters, and the y-axis represents the count of samples. The bars are stacked with colors: blue, orange, green, red, purple, brown, pink, grey, yellow, and cyan. As the number of clusters increases, the distribution becomes more uniform across the 10 categories.
